CALL FOR PAPERS

VII European Banking Supervisor XBRL Workshop Munich, Deutsche Bundesbank, on May 9th and 10th 2007

1 Introduction

The COREP and FINREP project team is going to hold the VII European Banking Supervisors XBRL Workshop in Munich, Germany, on May 9th and 10th 2007. The workshop will take place in the premises of the Deutsche Bundesbank.

Suggested timetable (reducing the number of nights out home) may be:

May 9th 10:00 - 12:30: Informal meeting for early birds

May 9th 13:30 - 18:00: Workshop opening and presentations

May 10th 09:00 - 13:00: Presentations and conclusions

The European Banking Supervisor XBRL Workshop is intended to communicate the progress and the development of international taxonomies in both the area of Solvency Reporting of Basel II (COREP) and International Financial Reporting (FINREP). After almost two years of development, both taxonomies reached a final state a few months ago and are currently being maintained by the project team.

Whilst previous workshop events concentrated on the architecture and design of the taxonomies, the VII workshop is going to focus on real implementations of COREP and FINREP at national level. Many countries have already set up projects and are starting to receive XBRL instance documents for these reports in 2007.

2 Who can participate?

Participation is oriented for European banking supervisors and representatives of banks and financial institutions affected by the XBRL development of COREP and FINREP.

The presence of the supporting industry is also welcome.

Participation is free of cost.

As usual, the priorities are speakers, then supervisors, then financial institutions, and then supporting industry, in the order of reception in each category, until full book.

In order to coordinate the expected audience and logistics with the Deutsche Bundesbank, who is kindly hosting the Workshop; it is recommended sending a simple message of intentions to info@corep.info , with institution name, number of potential participants and contact e-mail.

A formal Application Form will be distributed in due course.

3 What to present?

For the workshop to cover various topics and to give valuable information to the attendees, the project team is asking for presentations about national initiatives and the progress and developments of national projects around COREP and FINREP as well as suggestions and ideas regarding the development, test, implementation and maintenance of international taxonomies in a harmonized way.

Representatives of banks and financial institutions are also welcome to present their comments and initiatives regarding the XBRL-based reporting.

The Workshop is not oriented to contain presentations from the industry. These will be better held and can be attended at the 15th International XBRL Conference in Munich from June 4th to June 7th 2007

The presentations to be held during the workshop should mainly focus on initiatives and projects in Europe related with the XBRL developments in the COREP and FINREP projects. The background of running projects or projects in planning is as welcome as the experience gained from finished developments which are already in practical use.

Representatives of banks and financial institutions please present their initiatives in projects related to the XBRL-based reporting in COREP and FINREP from the "sending" side. These presentations may also include comments to and consequences of the new CEBS XBRL reporting framework.

Please consider these presentations should concentrate on the information technology point of view, thus the **technical domain rather than the business domain**.

Presentations proposals should be addressed to info@corep.info

4 More information

For more information on the COREP and FINREP projects and on the VII European Banking Supervisor XBRL Workshop please visit the websites <http://www.corep.info> or <http://www.finrep.info>: Up to date information is available joining the Yahoo Groups XBRL-COREP and XBRL-FINREP.
