

XBRL in the solvency II landscape

EIOPA – XBRL Central Europe event 11 of april 2012

Solvency II Timeline

18 April 2012

Solvency II Scope

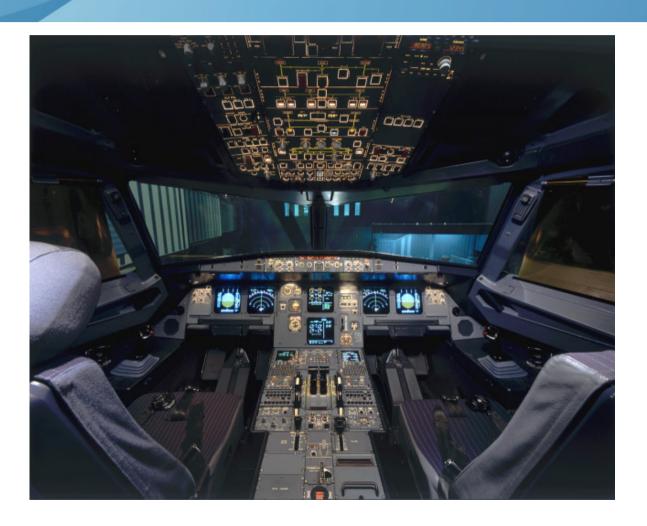

- A comprehensive project
- Split in interlinked components
- Developed in parallel

Solvency II Scope

Plopa

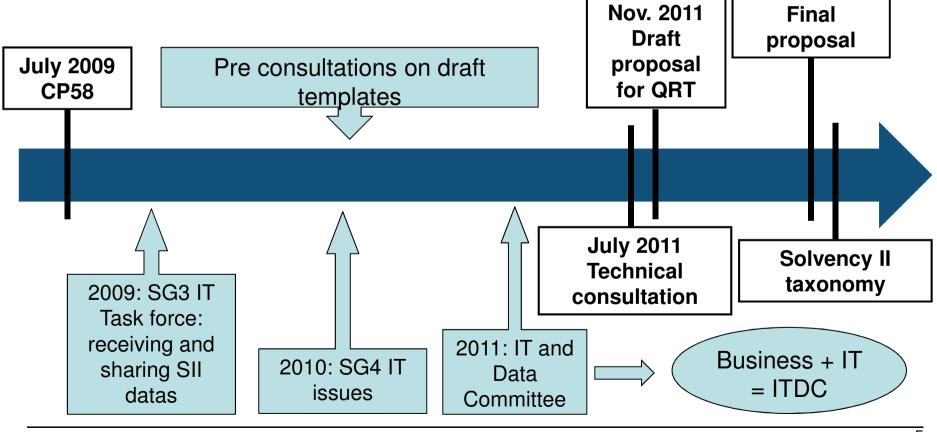

Solvency II Reporting

 Solvency II reporting business part addressed by IGSRR subgroup 3

Reporting issues

- Current situation:
 - o Non harmonized prudential reporting
 - o Often based on Excel data collection, using XML has underlying data envelope
 - o Well fitted to national situations
 - o Sharing issues due to lack of common IT format and of semantic comparability

Reporting issues (2)

- Solvency II principles:
 - o Maximum harmonisation of content / meaning for prudential reporting
 - o Simultaneous pan-european replacement of existing requirements, at the sector sector
 - o Increased need to share information: Supporting college work for groups, Financial stability data needs, ...

XBRL choice

- XML based
 - o With a defined methodology to split reporting attributes (validations, rendering, ...)
- Endorsed by EIOPA Board of Supervisors for data sharing between NSAs and EIOPA
- Mutualized development:
 - o An EIOPA effort instead of 30 national efforts
 - o Experience sharing with the others ESAs (EBA, ESMA)
- No change in the existing reporting path:
 - o Undertakings report to NSAs
 - o Then NSAs exchange between themselves and EIOPA

XBRL issues

- Main issues to solve for a successful implementation
 - o Scarcity of available skilled XBRL resources
 - o Short timeframe before the go-live date

Thank you!
